

Formulae compounds eyelash and eyebrow serums with bimatoprost.

Bimatoprost is a synthetic analogue of prostaglandin pGF2a. It regulates the growth phase of the hair follicles, stimulates and prolongs the anagen phase resolved in hair growth, including lengthening, thickening and darkening. A dysregulation in the prostaglandin pathway can lead to hypotrichosis of the eyelashes and eyebrows.

Some compounded formulas require a prescription from the doctor. Contact our pharmacy or one of our sales representatives for more information.

Formulae Eye Lash Serum

Consumer Medicine Information (CMI) for Bimatoprost Formulae Eyelash Growth Serum

What is Bimiprost?

Bimiprost 0.03% (plus Biotin , B5) is a prescription eyelash growth serum designed to enhance the length, thickness, and darkness of your eyelashes. It contains active ingredients that stimulate the growth phase of your lashes, resulting in a more voluminous and attractive appearance.

Important Information:

1. Bimiprost is for external use only. Avoid contact with your eyes, as it may cause irritation.
2. Do not use Bimiprost if you are allergic to any of its ingredients.
3. Consult your healthcare professional before using Bimiprost if you have a history of eye disorders or are currently using any other eye products.
4. Keep Bimiprost out of reach of children.
5. If you experience any adverse reactions or discomfort, discontinue use and seek medical advice.

How to Use Bimiprost:

1. Ensure your face is clean and makeup-free.
2. Using the supplied applicator brush, apply a thin line of Bimiprost along the base of your upper eyelashes.
3. Avoid getting the serum in your eyes or on the lower eyelid. If any serum gets into your eyes, rinse immediately with water.
4. Blot any excess serum with a tissue.
5. Use Bimiprost once daily, preferably in the evening, before bedtime.
6. Do not apply Bimiprost to the lower lashes or any other part of your body.

Expected Results and Duration:

Bimiprost requires consistent use for a prolonged period to achieve noticeable results. Individual outcomes may vary. Most users experience visible improvements in eyelash length, thickness, and darkness after several weeks of regular use. Maximum results are typically seen after three to four months of continuous application.

Possible Side Effects:

Bimiprost may cause mild side effects in some individuals. These can include temporary eye redness, itchiness, and darkening of the eyelid or the colored part of the eye (iris). If you experience any persistent or severe side effects, consult your healthcare professional.

Storage:

Store Bimiprost in a cool, dry place away from direct sunlight. Do not freeze. Keep the bottle tightly closed when not in use.

Additional Information:

If you have any concerns or questions about Bimiprost or your treatment, please consult your healthcare professional or our pharmacist. They can provide you with personalized advice based on your specific needs.

Bimiprost is compounded by Formulae Compounding group.

Date of Preparation:

This CMI brochure was prepared on June 2023 and is based on the most up-to-date information available at that time.
